

MUCHUO'S CENTRE FOR TRAINING & DEVELOPMENT

Complete Software Testing Programme

"From Beginner to Job Ready"

STUDENT PROGRAMME GUIDE

Modern QA Training · Practical · Career Focused

Welcome

Welcome to the Complete Software Testing Programme at Muchuo's Centre for Training & Development. This programme takes you from beginner foundations to job-ready QA skills through structured learning, live classes, practical projects, and career preparation.

What this programme is about

- A complete pathway covering manual testing, API testing, SQL, automation, mobile testing, CI/CD, and ISTQB Foundation.

What students will achieve

- Build real portfolios, frameworks, and professional materials that prepare you for software testing roles.

What is expected from them

- Attend live sessions, complete practical work, practise daily, and engage with feedback and mock interviews.

How to get the best results

- Study consistently (around 2 hours daily), apply tools hands-on, revise for ISTQB Fridays, and use tutor support early.

Programme at a Glance

COURSE DURATION

12–16 Weeks

STUDY TIME

2 Hours Daily

LIVE CLASSES

Saturday & Sunday (2–4 Hours)

ISTQB CLASSES

Every Friday

DELIVERY

Included

Your Learning Journey

PHASE 1

Software Testing Fundamentals

- SDLC
- STLC
- Testing Principles
- Testing Types
- Testing Levels
- Defect Life Cycle

PHASE 2

Manual UI Testing

- Test Cases
- Bug Reporting
- Azure DevOps
- Jira
- Test Execution
- Test Evidence

PHASE 3

Manual API Testing

- REST API
- Postman
- Swagger
- Authentication
- JSON
- Status Codes

PHASE 4

ISTQB Foundation

Parallel with Phase 2 & 3

- Complete CTFL Syllabus
- Mock Exams
- Exam Techniques
- Revision Classes

PHASE 5

SQL

- SELECT
- WHERE
- JOIN
- GROUP BY
- Database Validation

PHASE 6

Automation Testing (UI and API)

- C#
- Selenium
- Reqnroll
- RestSharp
- Framework Design
- Reporting

PHASE 7

Mobile Testing

- Maestro
- Appium
- Android
- iOS
- Emulator
- Real Devices

PHASE 8

CI/CD

- Azure DevOps
- GitHub
- Git Actions
- Test Pipelines

PHASE 9

Career Preparation

- CV
- LinkedIn
- Portfolio
- Interview Preparation
- Mock Interviews

Software & Tools

IDEs

- Visual Studio
- Rider

Manual Testing

- Azure DevOps
- Jira
- Postman
- Swagger

Automation

- Selenium
- Reqnroll
- RestSharp
- Appium
- Maestro

Version Control

- Git
- GitHub

What You Will Build

✓ Manual Testing Portfolio

✓ API Testing Portfolio

✓ SQL Exercises

✓ UI Automation Framework

✓ API Automation Framework

✓ Mobile Automation Framework

✓ Azure DevOps Project

✓ Professional CV

✓ LinkedIn Profile

✓ Interview Preparation

Learning Outcomes

By the end of this programme you will be able to:

▶ Design professional Test Cases

▶ Test REST APIs

▶ Build UI Automation Frameworks

▶ Automate Mobile Applications

▶ Report defects professionally

▶ Work confidently within Agile teams

▶ Execute Manual UI Tests

▶ Validate databases using SQL

▶ Build API Automation Frameworks

▶ Integrate automated tests into CI/CD

▶ Prepare for Software Testing interviews

Career Opportunities

Roles

- Junior Software Tester
- Manual Tester
- QA Analyst
- Automation Test Engineer
- QA Automation Engineer
- Software Test Analyst
- SDET

Typical industries

- Finance
- Retail
- Healthcare
- Insurance
- Government
- E-commerce
- Technology
